

PORTFOLIO

NIKESH SUWAL

UX / UI DESIGNER

Spectra Pass

SpectraPass was built by airlines veterans who needed to authenticate healthy passengers quickly and also receive the customer's details directed by the customers themselves. The system is meant to ease entry and access for customers and to facilitate opening up businesses and the economy in a postpandemic world.

As a UI/UX designer, my focus was on creating an intuitive, user-friendly interface that ensures seamless interactions while prioritizing user control and security.

I have designed both B2C customer apps as well as B2B dashboards for admin.

Landing page

Wolo is a social media and lifestyle application that lets you curate your life via pictures-one picture at a time.

As the UI/UX designer for the WOLO app, I transformed the client's vision into a streamlined, user-centric platform. My focus was on creating a clutter-free, intuitive experience that allowed users to easily curate and revisit their memories through photos.

Splashnode is a digital signage software that offers a platform to create, manage and distribute contents over different networks. It is a revolutionary product, which allows businesses, marketers and advertisers of all sizes to broadcast targeted, meaningful and engaging advertisements content for a wide audience anytime, anywhere, anyplace.

As a UI/UX designer, I specialize in crafting intuitive, user-friendly interfaces that deliver seamless interactions while emphasizing user control and security.

My experience spans designing B2B admin dashboards, ensuring functionality and aesthetics align with user needs and business goals.

SANDCASTLE

Sandcastle is a centralized hospitality management software with integrated solutions like property management and central reservation, all in one platform.

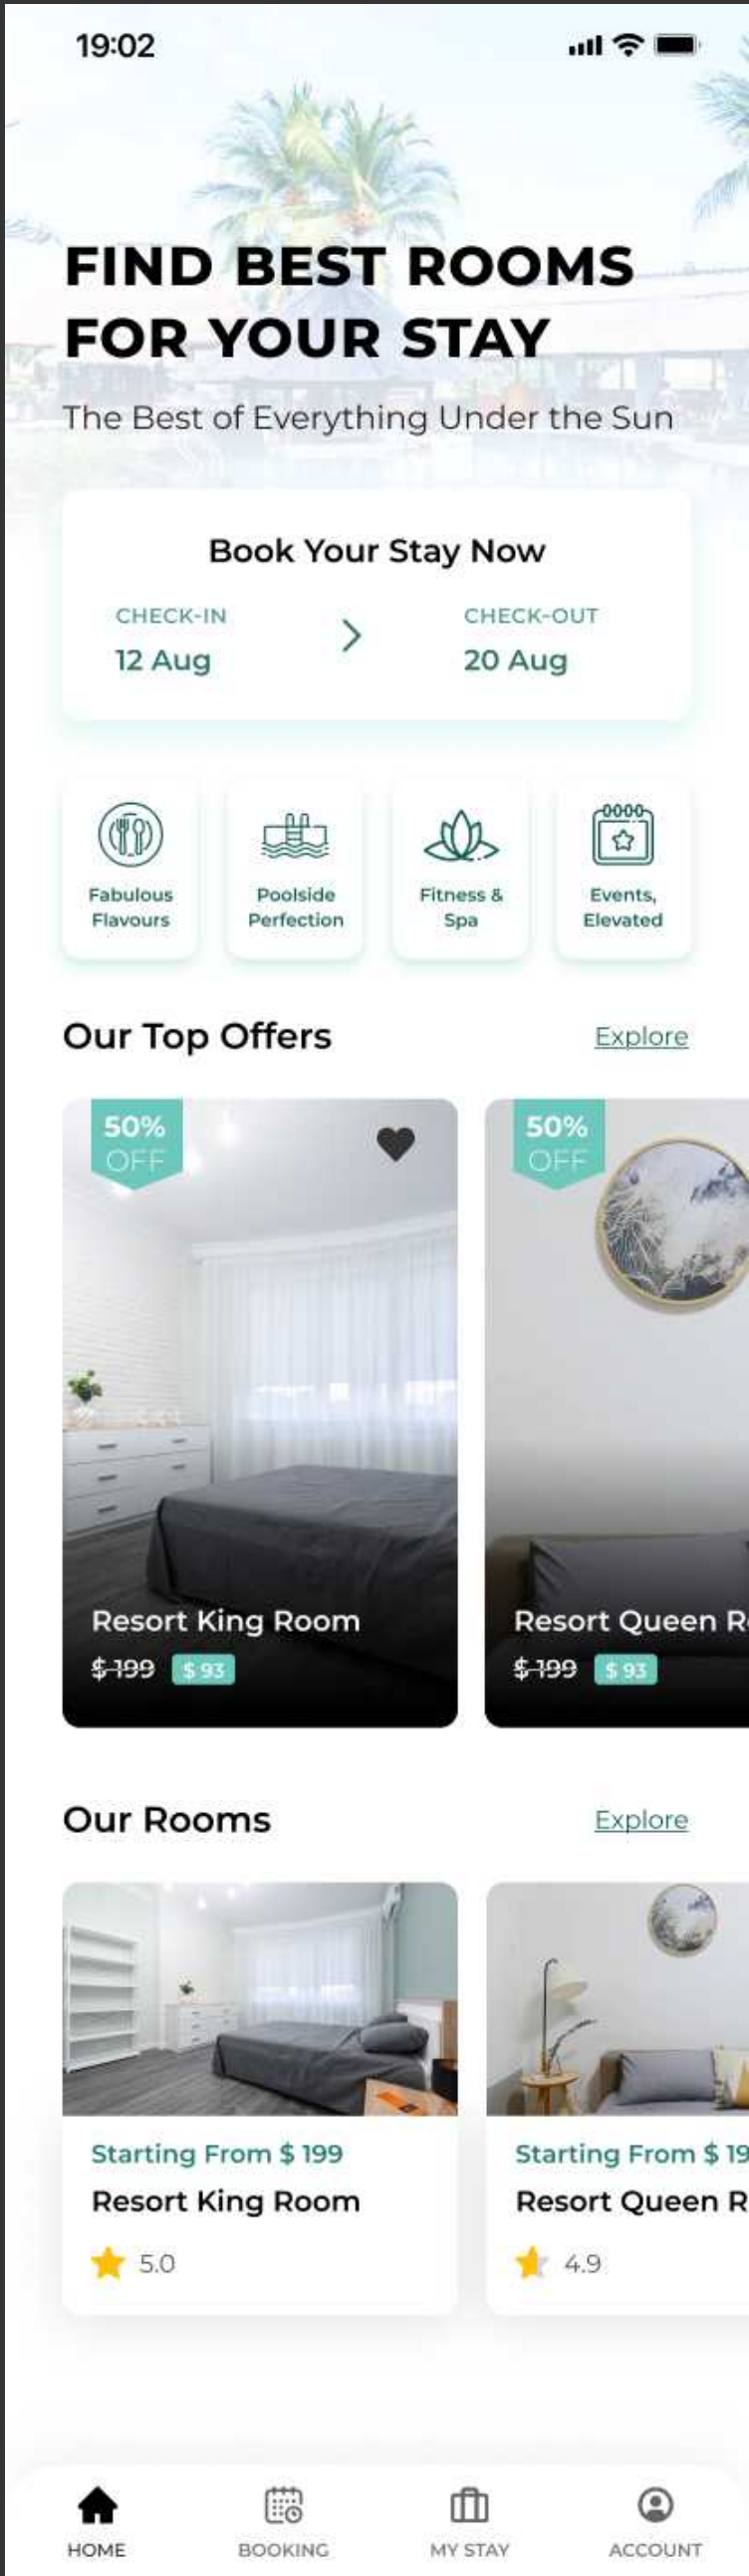

As a UI/UX designer for Sandcastle, I designed a cohesive and intuitive interface that streamlined complex hospitality management tasks into a centralized platform. By focusing on user-centric design, I ensured seamless navigation across integrated solutions like property management and central reservation. This approach enhanced usability, enabling efficient workflows for users.

I have designed both B2C customer apps as well as B2B dashboards for admin.

Design System

Throughout the eight years of my career, I have always strived to ensure that my passion and enthusiasm for my work shine through. Despite my success as a UI/UX designer, I achieve my greatest potential as part of a team.

I have learnt that having a platform through which I can question and develop ideas can harness greater creativity - although bringing creative inspiration to life doesn't come without its obstacles. Time management and working to tight deadlines are important in any industry, but the foundations and biggest challenges of design lie in communication. In my years of experience I have relished these challenges and used them to fuel my ambition and to maintain my own high standards.

Skills

UX research • Information Architecture • Wireframing and UI prototyping • Interaction design • Visual communication • RWD • Mobile Design • User Data Analysis • User empathy • Curiosity • Organization • Communication • Collaboration

Tools

Figma • Zeplin • Miro • Clickup • Sketch • Canva • Photoshop • Illustrator • Hotjar • Google Analytics
